Studies in International Space Law Bin Cheng

This book's twenty-six articles fully examine the major developments and issues of the law governing human activities in space, those of states as well as those of private entities. Topics include the legal framework evolved by and through the United Nations; the legal status of astronauts, satellites, and outer space, including the moon and other celestial bodies; the military and commercial use of outer space; environmental protection; governmental responsibility for space activities; liability for damage caused by space objects, communications satellites; television broadcasts; remote sensing; commercial launchings; and the application of national laws on board spacecraft, space stations, and on the moon and other celestial bodies.
