Continuing Innovation in Information Technology: Workshop Report Committee on Continuing Innovation in Information Technology, Computer Science and Telecommunications Board, Division on Engineering and Physical Sciences, Engineering, and Medicine National Academies of Sciences

The 2012 National Research Council report *Continuing Innovation in Information Technology* illustrates how fundamental research in information technology (IT), conducted at industry and universities, has led to the introduction of entirely new product categories that ultimately became billion-dollar industries. The central graphic from that report portrays and connects areas of major investment in basic research, university-based research, and industry research and development; the introduction of important commercial products resulting from this research; billion-dollar-plus industries stemming from it; and present-day IT market segments and representative U.S. firms whose creation was stimulated by the decades-long research.

At a workshop hosted by the Computer Science and Telecommunications Board on March 5, 2015, leading academic and industry researchers and industrial technologists described key research and development results and their contributions and connections to new IT products and industries, and illustrated these developments as overlays to the 2012 "tire tracks" graphic. The principal goal of the workshop was to collect and make available to policy makers and members of the IT community first-person narratives that illustrate the link between government investments in academic and industry research to the ultimate creation of new IT industries. This report provides summaries of the workshop presentations organized into five broad themes - (1) fueling the innovation pipeline, (2) building a connected world, (3) advancing the hardware foundation, (4) developing smart machines, and (5) people and computers - and ends with a summary of remarks from the concluding panel discussion.

From reader reviews:

Christopher Clarke:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, the actual best subject for that? Merely you can be answered for that problem above. Every person has several personality and hobby for each and every other. Don't to be pressured someone or something that they don't desire do that. You must know how great in addition to important the book Continuing Innovation in Information Technology: Workshop Report. All type of book are you able to see on many sources. You can look for the internet resources or other social media.

Orlando Hernandez:

Often the book Continuing Innovation in Information Technology: Workshop Report will bring that you the new experience of reading a book. The author style to elucidate the idea is very unique. In case you try to find new book you just read, this book very appropriate to you. The book Continuing Innovation in Information Technology: Workshop Report is much recommended to you to learn. You can also get the e-book from your official web site, so you can more readily to read the book.

Mary Young:

As a pupil exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some book, they are complained. Just minor students that has reading's soul or real their leisure activity. They just do what the educator want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that studying is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Continuing Innovation in Information Technology: Workshop Report can make you really feel more interested to read.

Melvin Lucero:

E-book is one of source of information. We can add our know-how from it. Not only for students but additionally native or citizen want book to know the up-date information of year for you to year. As we know those textbooks have many advantages. Beside we add our knowledge, may also bring us to around the world. Through the book Continuing Innovation in Information Technology: Workshop Report we can get more advantage. Don't one to be creative people? To become creative person must like to read a book. Just simply choose the best book that suitable with your aim. Don't possibly be doubt to change your life with this book Continuing Innovation in Information Technology: Workshop Report. You can more inviting than now.
