## Design of Racing and High-Performance Engines - 1998-2003 (Progress in Technology)

The 53 technical papers in this book show the improvements and design techniques that researchers have applied to performance and racing engines. They provide an insight into what the engineers consider to be the top improvements needed to advance engine technology, and cover subjects such as: Variable valve control New racing engines Combustion evaluation Direct injection Valve spring advancements Turbocharging. Design of Racing and High-Performance Engines is an update to an earlier version edited by Joseph Harralson (Design of Racing an High-Performance Engines, 1995, PT-53, published by SAE), and picks up where Harralson's book leaves off, examining the progression of technology in racing and high performance engines from 1998 through early 2003.
