Oracle Shell Scripting: Linux and UNIX Programming for Oracle (Oracle In-Focus series) (Volume 26) Jon Emmons

Shell scripting is necessary for automating a broad range of administration tasks on Oracle servers. Many Oracle administrators and developers lack a strong system administration background and therefore manually perform these tasks at the cost of time, money and sustainability. This book will discuss how to automate many of the common Oracle administration tasks as well as the methods necessary to automate site-specific tasks. Special attention will be given to writing industry strength scripts which free the Oracle professional from daily maintenance tasks yet provide proper tracking and feedback to ensure the best possible operation. With the expert techniques discussed in this book the reader will gain a functional knowledge of the building blocks of server-side shell scripting. In addition to these techniques the reader will gain access to over 50 working scripts which can either be implemented as-is or be used as a basis for further scripts. Topics include a background on shells and shell scripting, detailed step-by-step instructions on building shell scripts for administration tasks, how to tell when things are working right and how to effectively monitor the system for failures. Shell scripting is one of the most universal tools on UNIX and Linux. Shell scripting allows the administrator to combine any number of commands to be executed simultaneously or sequentially with a single script. Sophisticated flow control allows shell scripts to react to conditions in the environment appropriately without the need for human intervention. These scripts can be run manually to combine many steps into a single command. Regular tasks can be automated through the use of 'cron' freeing the administrator from the burden of repeatedly executing scripts. This book is intended for any Oracle professional who is running Oracle on Linux or UNIX. The techniques discussed span all versions of Oracle and will be applicable by Oracle administrators, database developers, database programmers and anyone else who spends time at a UNIX prompt. This book combines shell scripting techniques for beginner to expert with dozens of working scripts. The skills discussed in this book will help the Oracle professional automate routine tasks freeing the administrator for more important duties. The scripts included with this text will give the Oracle professional a fantastic head-start on automating their administration duties as well as being easily modifiable for any environment. This combination of techniques and working scripts provide a complete sustainable solution for automating and improving any Oracle environment. Oracle Shell Scripting fulfills a unique niche for the Oracle Professional. While many books cover the installation and configuration of Oracle on UNIX and Linux the Oracle professional is then set adrift in their new environment. This book is their roadmap in that new environment. Oracle Shell Scripting excels at elevating the skills and confidence of the UNIX novice. By focusing specifically on the tools needed by Oracle Professionals the tutorial portion of the book remains succinct and is complimented by the provided scripts saving the Oracle professional hours of work! This combination of how-to and scripts will render other 'pocket reference' books redundant while still entering at a lower price point than most version specific books. Other books in this space are version-centric and fail to thoroughly address UNIX and Linux topics important to the Oracle professional. This version-agnostic book addresses the shell scripting skills necessary for the Oracle professional to master their UNIX environment and to simplify and automate their administration tasks.

From reader reviews:

Jerry Brock:

Book is written, printed, or descriptive for everything. You can know everything you want by a reserve. Book has a different type. As we know that book is important thing to bring us around the world. Next to that you can your reading skill was fluently. A guide Oracle Shell Scripting: Linux and UNIX Programming for Oracle (Oracle In-Focus series) (Volume 26) will make you to end up being smarter. You can feel far more confidence if you can know about every thing. But some of you think that will open or reading the book make you bored. It is far from make you fun. Why they are often thought like that? Have you in search of best book or suitable book with you?

Dennis James:

Spent a free a chance to be fun activity to complete! A lot of people spent their leisure time with their family, or their friends. Usually they doing activity like watching television, going to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? May be reading a book might be option to fill your free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the publication untitled Oracle Shell Scripting: Linux and UNIX Programming for Oracle (Oracle In-Focus series) (Volume 26) can be very good book to read. May be it is usually best activity to you.

Jennifer Barton:

The reason? Because this Oracle Shell Scripting: Linux and UNIX Programming for Oracle (Oracle In-Focus series) (Volume 26) is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will shock you with the secret this inside. Reading this book next to it was fantastic author who all write the book in such awesome way makes the content inside of easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any more or you going to regret it. This unique book will give you a lot of gains than the other book include such as help improving your expertise and your critical thinking technique. So , still want to delay having that book? If I have been you I will go to the e-book store hurriedly.

Randy Caldera:

Playing with family in a very park, coming to see the ocean world or hanging out with pals is thing that usually you have done when you have spare time, in that case why you don't try matter that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Oracle Shell Scripting: Linux and UNIX Programming for Oracle (Oracle In-Focus series) (Volume 26), it is possible to enjoy both. It is good combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't understand it, oh come on its identified as reading friends.
