Cybernetic Revolutionaries: Technology and Politics in Allende's Chile (MIT Press) Eden Medina

In *Cybernetic Revolutionaries*, Eden Medina tells the history of two intersecting utopian visions, one political and one technological. The first was Chile's experiment with peaceful socialist change under Salvador Allende; the second was the simultaneous attempt to build a computer system that would manage Chile's economy. Neither vision was fully realized -- Allende's government ended with a violent military coup; the system, known as Project Cybersyn, was never completely implemented -- but they hold lessons for today about the relationship between technology and politics.

Drawing on extensive archival material and interviews, Medina examines the cybernetic system envisioned by the Chilean government -- which was to feature holistic system design, decentralized management, human-computer interaction, a national telex network, near real-time control of the growing industrial sector, and modeling the behavior of dynamic systems. She also describes, and documents with photographs, the network's Star Trek-like operations room, which featured swivel chairs with armrest control panels, a wall of screens displaying data, and flashing red lights to indicate economic emergencies.

Studying project Cybersyn today helps us understand not only the technological ambitions of a government in the midst of political change but also the limitations of the Chilean revolution. This history further shows how human attempts to combine the political and the technological with the goal of creating a more just society can open new technological, intellectual, and political possibilities. Technologies, Medina writes, are historical texts; when we read them we are reading history.

If you want to consider look for book, may be the book untitled Cybernetic Revolutionaries: Technology and Politics in Allende's Chile (MIT Press) can be great book to read. May be it can be best activity to you.

Nicole Powell:

As a college student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Cybernetic Revolutionaries: Technology and Politics in Allende's Chile

(MIT Press) can make you experience more interested to read.
