Depression and Mania: From Neurobiology to Treatment (Advances in Biochemical Psychopharmacology, Volume 49)

Depression and Mania: From Neurobiology to Treatment (Advances in Biochemical Psychopharmacology, Volume 49)

This volume examines the latest neurobiological and clinical research on depression and mania. Advances ranging from molecular biology and genetics to behavioural studies, pre-clinical and clinical pharmacology and prevention are highlighted. The text begins with a review of the neurobiology of depression, with a particular focus on dopamine. Other topics covered include: animal models of depression and mania; manipulation of inositol-linked second messenger systems as a therapeutic strategy in psychiatry; recent developments in genetics of bipolar illness; implications of a temperament-based classification of depression; pharmacological treatment of depression and comorbid anxiety disorders; and long-term prophylaxis of affective disorders.
