Science, and Technology International Assessment of Agricultural Knowledge

Agriculture at a Crossroads: Volume III: Latin America and the Caribbean Science, and Technology International Assessment of Agricultural Knowledge

The International Assessment of Agricultural Knowledge, Science, and Technology for Development (IAASTD) looks realistically at how we could effectively use agriculture/AKST to help us meet development and sustainability goals. An unprecedented three-year collaborative effort, the IAASTD involved more than 400 authors in 110 countries and cost more than \$11 million. It reports on the advances and setbacks of the past fifty years and offers options for the next fifty years.

The results of the project are contained in seven reports: a Global Report, five regional Sub-Global Assessments, and a Synthesis Report. The *Global Report* gives the key findings of the Assessment, and the five *Sub-Global Assessments* address regional challenges. The volumes present options for action. All of the reports have been extensively peer-reviewed by governments and experts and all have been approved by a panel of participating governments. The Sub-Global Assessments all utilize a similar and consistent framework: examining and reporting on the impacts of AKST on hunger, poverty, nutrition, human health, and environmental/social sustainability. The five *Sub-Global Assessments* cover the following regions:

- Central and West Asia and North Africa (CWANA)
- East and South Asia and the Pacific (ESAP)
- Latin America and the Caribbean (LAC)
- North America and Europe (NAE)
- Sub-Saharan Africa (SSA)
