TCP/IP Networking: Architecture, Administration, and Programming

James Martin, Joseph Leben

TCP/IP Networking: Architecture, Administration, and Programming James Martin, Joseph Leben

 The TCP/IP (Transmission Control Protocol/Internet Protocol) protocol suite forms the basis for the most widely used networking technologies in the world. This book describes the protocols that make up the TCP/IP protocol suite.   Explores TCP/IP architecture; Application Layer protocols and services; Transport Layer protocols; Internet Layer protocols; Internet administration; and client-server programming.   For users of a TCP/IP internet; technicians responsible for installing TCP/IP hardware and software products; technical staff members responsible for maintaining and administering a TCP/IP internet; and systems analysts, designers, and programmers who will be designing and implementing client-server applications that use TCP/IP internets for communication.
