Boat Building on a Glass Fibre Hull Dave Gannaway

This is intended for professional and amateur boat builders. Today the greatest number of cabin boat hulls-sail or power-are built of glass fibre; often specialist factories mold the glass fibre shells, which are then sent elsewhere for completion, and this usually entails a good deal of work in wood. In twenty thoroughly practical chapters the author tells how to set about the job from levelling up the hull, selecting tools and timbers, to fitting bulkheads, tanks, engines, steering, deck fittings, bunks, galley, and much else.
