This extensive handbook helps clinicians and physicians make a precise diagnosis as well as the right decisions for patient treatment. Up-to-date and comprehensive information for differential diagnosis is presented in a well-structured manner. The different sections describe more than 1950 conditions and around 1200 drugs. It also includes a comprehensive section on international reference values of clinical-biochemical and laboratory parameters. The detailed parameter index and an extensive list of frequently used synonyms and abbreviations enable the reader to quickly locate the information they are looking for.
