SUBTECH '91: Back to the Future. Papers presented at a conference organized by the Society for Underwater Technology and held in Aberdeen, UK, ... Ocean Science and Offshore Engineering)

The concept of using flexible, reelable pipe to transport liquids, gases, and vapours is not a new one. As early as the 1940s a steel braided elastomeric pipeline was developed for the Allied Forces in order to transport fuels to support the Normandy Beachheads. In fact, the longest flexible pipeline ever constructed is likely to be that laid across the English Channel as part of 'Operation Pluto'. The methodology used to handle and instal such pipe is also not new. Ellis (1943, London) in an early patent specification identifies three basic objectives for a flexible pipelining method. These are: prefabrication of the pipe onshore; coiling of the pipe on suitable drums or reels; and using such reels to lay pipe from anchored or motorised barges. The design concept for flexible pipe is also not a new invention given that flexible hoses and umbilicals have been in service for more than sixty years. A break-through was however achieved by the French Institute of Petroleum in the early 1970s when they developed an improved steel reinforced pipe structure having a high axial loading capacity which utilised corrosion and hydrocarbon resistant polymers to extend pipe service lifetime. This early pipe design utilised established cable making techniques to apply steel armour and axially and radially reinforce alternating layers of polymer sheaths. The pipe was primarily developed as a flowline for use in static seabed applications.

From reader reviews:

Janet Medley:

This book untitled SUBTECH '91: Back to the Future. Papers presented at a conference organized by the Society for Underwater Technology and held in Aberdeen, UK, ... Ocean Science and Offshore Engineering) to be one of several books that will best seller in this year, here is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy that book in the book retail store or you can order it by using online. The publisher in this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Cell phone. So there is no reason for you to past this e-book from your list.

Matthew White:

Spent a free time and energy to be fun activity to do! A lot of people spent their free time with their family, or their own friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to try look for book, may be the publication untitled SUBTECH '91: Back to the Future. Papers presented at a conference organized by the Society for Underwater Technology and held in Aberdeen, UK, ... Ocean Science and Offshore Engineering) can be good book to read. May be it is usually best activity to you.

Katherine Adkins:

SUBTECH '91: Back to the Future. Papers presented at a conference organized by the Society for Underwater Technology and held in Aberdeen, UK, ... Ocean Science and Offshore Engineering) can be one of your nice books that are good idea. Many of us recommend that straight away because this book has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort to get every word into delight arrangement in writing SUBTECH '91: Back to the Future. Papers presented at a conference organized by the Society for Underwater Technology and held in Aberdeen, UK, ... Ocean Science and Offshore Engineering) although doesn't forget the main level, giving the reader the hottest and based confirm resource info that maybe you can be one of it. This great information can certainly drawn you into completely new stage of crucial pondering.

Lisa Loo:

Reading a publication make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is composed or printed or descriptive from each source this filled update of news. In this particular modern era like at this point, many ways to get information are available for anyone. From

media social just like newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just in search of the SUBTECH '91: Back to the Future. Papers presented at a conference organized by the Society for Underwater Technology and held in Aberdeen, UK, ... Ocean Science and Offshore Engineering) when you essential it?
