The Freak Observer is rich in family drama, theoretical physics, and an unusual, tough young woman--Loa Lindgren.

For eight years, Loa Sollilja's world ran like one of those mechanical models of the solar system, with her baby sister, Asta, as the sun. Asta suffered from a genetic disorder that left her a permanent infant, and caring for her was Loa's life. Everything spun neatly and regularly as the whole family orbited around Asta.

But now Asta's dead, and 16-year-old Loa's clockwork galaxy has collapsed. As Loa spins off on her own, her mind ambushes her with vivid nightmares and sadistic flashbacks--a textbook case of PTSD. But there are no textbook fixes for Loa's short-circuiting brain. She must find her own way to pry her world from the clutches of death.

The Freak Observer is a startling debut about death, life, astrophysics, and finding beauty in chaos.
