Coastal Law (Aspen Casebook) Josh Eagle

For the modern course on theory and practice, Coastal Law features engaging coverage of laws meant to balance public and private interests in coastal resources and their application in coastal communities. Designed with instructor's needs in mind, the organization structures readings and questions for ease of course design and execution. A state-of-the art approach to helping students prepare for class uses informative and interesting "quick questions," maps, photographs, and diagrams that both help connect students with the material and optimize retention. Unique, multi-disciplinary content gives a concise introduction to basic coastal geology, ecology, geography, and economics that students need in order to understand coastal law and policy. On the cutting-edge of issues such as climate change, oil spill litigation, and hurricane insurance, Coastal Law showcases the most recent, important cases on coastal land-use regulation. End-of-chapter summaries and exercises aid in comprehension of material, allow for interim self-testing, and encourage in-class review.
