This brief reflection on time covers a variety of topics that provoke deeper discussion on the entirety of human endeavor. Reset Theory seeks to identify a unifying idea that ties in everything within the universe. All cultural systems are an expression of human desires and an attempt to mitigate life's inherent uncertainties and vicissitudes. Similarly, economic systems ebb and flow similar to natural rhythms and cycles. From this essential notion, this treatise relates scales of cycles that affect our existence. It proposes a number of solutions through appreciating natural limits, as a parallel and interwoven human expression. Finally, the book asks a vital question: to what extent does human development expose our species to higher risk of total system collapse and ultimately greater suffering for more people.
