Applications of Synchrotron Radiation: High-Resolution Studies of Molecules and Molecular **Adsorbates on Surfaces (Springer Series in Surface Sciences)**

This field has now matured from being an exotic experimental field into a well-established area of science. The spectroscopy of molecules and molecular adsorbates on surfaces is one area of science where synchrotron-radiation-related studies had made an impact on understanding the ground-state properties as well as the dynamics. With the new high-brightness synchrotron-radiation sources ahead, this will certainly continue to be a field of very active research.
